

September 4, 2008

The Honorable David R. Obey
Chairman
Committee on Appropriations
2314 Rayburn House Office Building
Washington, DC 20515

Dear Chairman Obey:

The Friends of NCHS (list attached) wish to thank you for proposing a funding level of \$124.7 million for National Center for Health Statistics (NCHS) in the Labor, Health and Human Services, Education, and Related Agencies fiscal 2009 appropriations mark. We greatly appreciate your leadership in restoring funding for this vital agency and the health data it collects.

As you prepare the fiscal 2009 continuing resolution, we respectfully ask that you consider providing NCHS with the \$124.7 million proposed in your mark. NCHS needs this funding now to preserve its current and future data collection efforts. Without the funding needed to revise, pretest, and plan data collection activities for calendar year 2009 and beyond, NCHS may be forced to make the following cuts:

- Reducing by half its National Health Interview Survey (NHIS) sample, which has monitored trends in illness, disability, and health insurance coverage for over 50 years. Such cuts will jeopardize data on health insurance coverage at a time when policymakers need these data to formulate and evaluate health system changes. These cuts will also have significant adverse effects on our ability to understand the health status of minority groups and health disparities at a time when our society becomes increasingly diverse.
- Postponing until at least fiscal 2011 its Nursing Home Survey, which was last conducted in 2004. Further delays in the collection of these essential data will prolong our understanding of the provision and financing of long-term care at a time when more and more aging and disabled Americans seek care in these sites of service.
- Taking its National Hospital Discharge Survey—which has been conducted annually since 1965—out of the field. Doing so will mean no data in calendar year 2009 on the characteristics of inpatients discharged from U.S. hospitals, e.g., average length of stay and rates of surgical and non-surgical procedures by age, race, and gender. In

addition, work will be suspended on the survey redesign to provide a wider range of data to reflect changes in health care delivery.

- Purchasing only “core items” of birth and death data from states (e.g., place of residence, age of mother, race of parents, and gender). Nearly all data items that are routinely used to monitor maternal and infant health, such as use of prenatal care, smoking during pregnancy, medical risk factors, and educational attainment of parents, would be considered “enhanced data items” and would not be collected from all states. As a result, complete national data on key risk factors would be unavailable and will only be collected if sufficient funding is available.

Flat and/or delayed funding in fiscal 2009 and uncertainty about future funding could result in even more drastic cuts in fiscal 2010 and beyond. These could include:

- Deeper cuts to the NHIS sample, or taking the survey out of the field altogether.
- Reducing by half its National Health and Nutrition Examination Survey (NHANES) sample, eliminating the practice of oversampling of minority populations, or taking NHANES out of the field.
- Postponing the Home Health and Hospice Survey, further limiting our understanding of long-term and end-of-life care.

The Friends are very concerned that postponing the proposed \$11 million funding increase until early 2009 will force NCHS to eliminate these data collection efforts in the interim and they will not be restored. By way of background, when NCHS has faced budget shortfalls and cut data collection in the past, the data are only restored years later. Under severe budget constraints, as we see now, the data are never restored (e.g., the elimination of data collection on marriage, divorce, and abortions).

Your leadership demonstrates your commitment to ensuring that NCHS is able to continue uninterrupted collection of vital statistics, restore other important data collection and analysis initiatives, and modernize its systems to increase efficiency, interoperability, and security. Please know that the Friends of NCHS and our grassroots partners stand ready to support you in securing \$124.7 million for NCHS in fiscal 2009.
